The journal exists for the publication of experimental and theoretical investigations of combustion phenomena and closely allied matters. Among the subjects emphasized are: atmospheric pollution from combustion; combustion in practical systems; deflagration and detonation waves; electrical aspects of flames; experimental techniques; fire phenomena; flame ignition, inhibition, propagation, stability and structure; fluid dynamics and combustion; heat transfer and radiation; heterogeneous combustion; kinetics and mechanisms of combustion reactions; limits of flammability and of spontaneous ignition; modeling and scaling in combustion processes; new applications of combustion; propellants; sooting; spectra; supersonic reacting flow; thermal decomposition processes; thermochemistry and thermodynamics; transient species; transport properties and turbulence in flames. Critical reviews of current work will be invited. Relevant books will be reviewed. Announcements, Notices, and Reports of Combustion Institute meetings will be published whenever possible.

SUBJECT INDEX

Volumes 24-25, 1975

1. ATMOSPHERIC POLLUTANTS FROM COMBUSTION

Probe Sampling of Oxides of Nitrogen from Flames, **24**, 133

Fundamental Studies on the Volkswagon Stratified Charge Combustion Process, **25**, 15

The Ratio NO_2/NO in Fuel-Lean, **25**, 85

Molecular Beam Sampling of H_2CO and NO in One-Atmosphere Methane-Air Flames, **24**, 391

Reply to Comment of D. J. Seery and C. T. Bowman, **25**, 399

Direct Optical Evidence for the Presence of Sooty Agglomerates in Flames, **24**, 139

Nitric Oxide and Composition Measurements Within Diffusion Flames Around Simulated Ethanol and Ethanol-Pyridine Droplets, **25**, 107

A Technique for Time Resolved Nitric Oxide Measurements in Auto-Igniting Mixtures, **25**, 197

Predicted Effects of Fluid Dynamic Parameters on Nitric Oxide Formation in Turbulent Jet Diffusion Flames, **25**, 67

Comment on "Molecular Beam Sampling of H_2CO and NO in One-Atmosphere Methane-Air Flames", **25**, 397

Hydrogen Interference in Chemiluminescent NO_x Analysis, **25**, 273

Effect of Fuel Sulfur Species on Nitrogen Oxide Emissions from Premixed Flames, **25**, 355

Soot Concentration and Absorption Coefficient in a Low-Pressure Flame, **24**, 1

2. COMBUSTION IN PRACTICAL SYSTEMS

An Investigation of a Coaxial Spark Igniter with Emphasis on its Practical Use, **25**, 187

Fundamental Studies on the Volkswagon Stratified Charge Combustion Process, **25**, 15

3. CRITICAL REVIEWS

Turbulence and Turbulent Flame Propagation–A Critical Appraisal, **24**, 285

4. DETONATION WAVES

A Computational Technique for the Evaluation of Dynamic Effects of Exothermic Reactions, **24**, 319

Effects of Size and Dilution on Dynamic Properties of Exothermic Centers, **24**, 207

Studied of the Various Phenomena Produced by the Explosion of Explosive Compounds, **25**, 313

Evidence of Secondary Exothermic Reactions in Expanding Detonation Products from Condensed Explosives, **24**, 335.

Sensitivity of Porous Explosives to Transition from Deflagration to Detonation, **25**, 91

From Celluar Structure to Failure Waves in Liquid Detonations, **25**, 241

5. DIFFUSION FLAMES

Predicted Effects of Fluid Dynamic Parameters on Nitric Oxide Formation in Turbulent Jet Diffusion Flames, **25**, 67

Nitric Oxide and Composition Measurements Within Diffusion Flames Around Simulated Ethanol and Ethanol-Pyridine Droplets, **25**, 107

Low-Frequency Diffusion Flame Oscillations, **25**, 153

Characteristics of An Open Diffusion Flame, **25**, 137

6. ELECTRICAL ASPECTS OF FLAMES

The Influence of Spark Discharge Characteristics on Minimum Ignition Energy in Flowing Gases, **24**, 99

Electron Temperatures in Flame Gases: Experiment and Theory, **24**, 169

Some Measurements of the Ion Current to a Spherical Probe in an Atmospheric Pressure Combustion M.H.D. Plasma, **25**, 393

Prediction of Rocket Exhaust Flame Properties, **25**, 43

The Prediction of the Fluctuations in the Properties of Free, Round-Jet, Turbulent, Diffusion Flames, **24**, 109

Laser Interferometric Studies of the Control of

Heat Transfer from Flame Gases by Electric Fields, **25**, 321
The Role of Negative Halogen Ions in Hydrocarbon Flame Inhibition, **24**, 211
An Experimental Study of the Effects of High Frequency Electric Fields on Laser-Induced Flame Propagation, **24**, 159
An Investigation of a Coaxial Spark Igniter with Emphasis on its Practical Use, **25**, 187

7. EXPERIMENTAL TECHNIQUES
Some Measurements of the Ion Current to a Spherical Probe in an Atmospheric Pressure Combustion M.H.D. Plasma, **25**, 393
The Influence of Spark Discharge Characteristics on Minimum Ignition Energy in Flowing Gases, **24**, 99
Methane Ignition by Frictional Impact Heating, **25**, 143
A Study of Pyrotechnic Reactions by Temperature Profile Analysis and Differential Thermal Analysis, **24**, 137
Influence of Probe Contamination on Recombination of Atomic Hydrogen, **25**, 277
A Study on the Structure of Premixed Turbulent Flames by the Microphone-Probe Technique, **25**, 5
Suspended Fuel Droplet Burning in a Combined High Pressure Environment, **25**, 259
Flammability Limits–A New Technique, **24**, 347
Soot Concentration and Adsorption Coefficient in a Low-Pressure Flame, **24**, 1
Probe Sampling of Oxides of Nitrogen from Flames, **24**, 133
Reply to Comment of D.J. Seery and C. T. Bowman, **25**, 399
A Technique for Time Resolved Nitric Oxide Measurements in Auto-Igniting Mixtures, **25**, 197
Comment on "Molecular Beam Sampling of H_2CO and NO in One-Atmosphere Methane-Air Flames", **25**, 397
Hydrogen Interference in Chemiluminescent NO_x Analysis, **25**, 273

8. EXPLOSIVES, PROPELLANTS, AND PYROTECHNICS
A Study of Pyrotechnic Reactions by Temperature Profile Analysis and Differential Thermal Analysis, **24**, 137
Thermal Explosion Theory for a Slab with Spatially Periodic Surface Temperature, **24**, 269
Effect of Pressure and Some Lead Salts on the Chemistry of Solid Propellant Combustion, **24**, 369
The Reaction of Potassium Chlorate with Lactose: Analysis of Combustion Gases, **24**, 21
Influence of Externally Applied Thermal Radiation on the Burning Rates of Homogeneous Solid Propellants, **24**, 185
A Modification of the Composite Propellant Erosive Burning Model of Lenoir and Robillard, **24**, 365
Deformation, Destruction and Ignition of the Layer of Solid Under Impact, **24**, 143
The Preignition Combustion Mechanism of Aniline Formaldehyde-Fuming Nitric Acid Hybrid Propellant, **25**, 129
Role of Metal Perchlorate Ammines on Ammonium Perchlorate Decomposition, **25**, 387
The Closed Bomb Test for the Assessment of Solid Propellant Grains Utilized in Guns, **25**, 229
The Stationary Problem of Thermal Ignition in a Reactive Slab with Unsymmetric Boundary Temperatures, **24**, 203
Flame Spreading Phenomena in Double Base Propellants, **25**, 335
Analysis of Liquid Rocket Combustion Chamber Turbulence Levels from Diffusion Data, **25**, 161
Pyrolysis of Ammonium Perchlorate in a Stream of Perchloric Acid Vapor, **25**, 135
Grain Velocities During Ignition of Gun Propellant, **24**, 199
On the Mechanism of the Copper (II)-Catalyzed Low-Temperature Decomposition of Ammonium Perchlorate, **25**, 269
Studies of the Various Phenomena Produced by the Explosion of Explosive Compounds, **25**, 313
Evidence of Secondary Exothermic Reactions in Expanding Detonation Products from Condensed Explosives, **24**, 335
Sensitivity of Porous Explosives to Transition from Deflagration to Detonation, **25**, 91

9. FIRE AND EXPLOSION PHENOMENA
Thermal Explosion Theory for a Slab With

Spatially Periodic Surface Temperature, 24, 269
Thermal Explosion Theory for Reactive Flow Between Parallel Heated Walls, 24, 151
Char Yield on Pyrolysis of Cellulose, 24, 263
Flammable Limits Over Liquid Surfaces, 24, 231
Critical Behaviour in Chemically Reacting Systems III—An Analytical Criterion for Insensitivity, 24, 43
Extinction of Wood Crib and Pallet Fires, 24, 305
Estimates of Luminous Flame Radiation from Fires, 24, 239
Pressure as a Function of Time and Distance in a Vented Vessel, 24, 65
Fire Induced Flow Through an Opening, 25, 369
Thermal Explosion of Interacting Hot Spots, 25, 25

10. FLAME IGNITION, STABILITY, AND QUENCHING OR EXTINCTION
Extinction of Wood Crib and Pallet Fires, 24, 305
Flame Spreading Phenomena in Double Base Propellants, 25, 335
Deformation, Destruction and Ignition of the Layer of Solid Under Impact, 24, 143
Methane Ignition by Frictional Impact Heating, 25, 143
The Influence of Spark Discharge Characteristics on Minimum Ignition Energy in Flowing Gases, 24, 99
An Investigation of a Coaxial Spark Igniter with Emphasis on its Practical Use, 25, 187
Shock Tube Studies of Methane and Ethane Oxidation, 24, 245
Effect of NO_2 on the Ignition Delay of CH_4-Air Mixtures, 24, 181
Shock Tube Investigation of Ignition in Methane-Oxygen-Nitrogen Dioxide-Argon Mixtures, 24, 173
Towards Absolute Minimum Ignition Energies for Dust Clouds?, 24, 53
Flame Stabilization on Fuel-Wetted Cylinders, 25, 121
Ignition and Extinction of a Monopropellant Droplet in an Inert Atmosphere, 25, 361
Experimental Study of Ignition and Subsequent Flame Spread of a Solid Fuel in a Hot Oxidizing Gas Stream, 24, 357
Asymptotic Theory for Ignition and Extinction in Droplet Burning, 24, 89
Ignition of Sprays by an Incident Shock, 25, 177
Low-Frequency Diffusion Flame Oscillations, 25, 153

11. FLAME STRUCTURE AND PROPAGATION
On the Inhibition of Low Pressure Quenched Flames by CF_3Br, 24, 401
A Study of ClO_2-C_2H_2 Flames at Low Pressure, 24, 381
Flame Characteristics in the Wake of a Burning Methanol Drop, 24, 273
Asymptotic Analysis of a Premixed Laminar Flame Governed by a Two-Step Reaction, 25, 389
The Effect of Droplet Size on the Burning Velocity of Kerosene-Air Sprays, 25, 247
Molecular Beam Sampling of H_2CO and NO in One-Atmosphere Methane-Air Flames, 24, 391
From Cellular Structure to Failure Waves in Liquid Detonations, 25, 241
An Experimental Study of the Effects of High Frequency Electric Fields on Laser-Induced Flame Propagation, 24, 159
A Study on the Structure of Premixed Turbulent Flames by the Microphone-Probe Technique, 25, 5
Reply to Comment of D. J. Seery and C. T. Bowman, 25, 399
Comment on "Molecular Beam Sampling of H_2CO and NO in One-Atmosphere Methane-Air Flames", 25, 397

12. FLAME SPECTRA AND EXCITED OR MINOR SPECIES
A Study of ClO_2-C_2H_2 Flames at Low Pressures, 24, 381
An Investigation of Arsenic and Antimony Additives in Unseeded and Potassium-Seeded H_2/O_2 Flames, 25, 101
Vibrational Temperature of $CO(A\,^1\Pi)$ in Reduced

Pressure $C_2H_2 + O_2$ Flames, **25**, 1
A Suggested Mechanism for the Visible Chemiluminescence Observed in Gas Phase Aluminum Oxidation, **25**, 31
Flame Emission Studies of Ozone with Metal Alkyls: $Zn(CH_3)_2$ and $Zn(C_2H_5)_2$, **24**, 27
Prediction of Rocket Exhaust Flame Properties, **25**, 43
Influence of Probe Contamination on Recombination of Atomic Hydrogen, **25**, 277
Probe Sampling of Oxides of Nitrogen from Flames, **24**, 133

13. FLAMMABILITY AND INHIBITION
On the Inhibition of Low Pressure Quenched Flames by CF_3Br, **24**, 401
The Combustion of Flexible Polyurethane Foams: Mechanisms and Evaluation of Flame Retardance, **24**, 217
Inhibition by CH_3Br of CH_4/Air Flames Stabilized on a Porous Burner, **24**, 405
Flame Inhibition by Potassium Compounds, **24**, 277
The Role of Negative Halogen Ions in Hydrocarbon Flame Inhibition, **24**, 211
Flammability Limits—A New Technique, **24**, 347
Flammable Limits Over Liquid Surfaces, **24**, 231

14. FLUID DYNAMICS IN COMBUSTION
A Study on the Structure of Premixed Turbulent Flames by the Microphone-Probe Technique, **25**, 5
Fluid-Mechanical Effects on the Combustion Rate of Solid Carbon, **25**, 57
Diffusion Processes in the Slow Oxidation of Isobutane, **25**, 219
Uncertainties in Evaluating Turbulent Diffusion Rates from Measured Mean Flow Properties, **24**, 129
Blast Waves Generated by Constant Velocity Flames: A Simplified Approach, **24**, 257
Turbulence and Turbulent Flame Propagation—A Critical Appraisal, **24**, 285
A Computational Technique for the Evaluation of Dynamic Effects of Exothermic Reactions, **24**, 319
Effects of Size and Dilution on Dynamic Properties of Exothermic Centers, **25**, 207
Predicted Effects of Fluid Dynamic Parameters on Nitrix Oxide Formation in Turbulent Jet Diffusion Flames, **25**, 67
The Prediction of the Fluctuations in the Properties of Free, Round-Jet, Turbulent, Diffusion Flames, **24**, 109
Laser Interferometric Studies of the Control of Heat Transfer from Flame Gases by Electric Fields, **25**, 321
A Modification of the Composite Propellant Erosive burning Model of Lenoir and Robbillard, **24**, 365
Analysis of Liquid Rocket Combustion Chamber Turbulence Levels from Diffusion Data, **25**, 161
Thermal Explosion Theory for Reactive Flow Between Parallel Heated Walls, **24**, 151
Pressure as a Function of Time and Distance in a Vented Vessel, **24**, 65
Fire Induced Flow Through an Opening, **25**, 369
An Investigation of a Coaxial Spark Igniter with Emphasis on its Practical Use, **25**, 187
Experimental Study of Ignition and Subsequent Flame Spread of a Solid Fuel in a Hot Oxidizing Gas Stream, **24**, 357

15. HEAT TRANSFER AND RADIATION IN COMBUSTION SYSTEMS
Laser Interferometric Studies of the Control of Heat Transfer from Flame Gases by Electric Fields, **25**, 321
Estimates of Luminous Flame Radiation from Fires, **24**, 239
A Technique for Time Resolved Nitric Oxide Measurements in Auto-Igniting Mixtures, **25**, 197
Influence of Externally Applied Thermal Radiation on the Burning Rates of Homogeneous Solid Propellants, **24**, 185

16. KINETICS AND MECHANISMS OF COMBUSTION REACTIONS
The Gas-Phase Reactions of Alkyperoxy Radicals Generated by a Photochemical Technique, **24**, 125
The Addition of Neopentane to Slowly Reacting Mixtures of Hydrogen and Oxygen at 480°C—I. Formation of Primary Products from Neopentane, **25**, 285.
A Shock-Tube Investigation of the High-Tempera-

ture Oxidation of Methanol, **25**, 343
Detection by E.S.R. of Peroxy Radicals: The Importance of Radical-Radical Reactions in the Slow Oxidation of Butane, **25**, 309
The Reaction Between Hydrogen Sulphide and Nitrogen Dioxide, **25**, 213
Pyrolysis of Isopropyl Nitrate. I. Decomposition at Low Temperatures and Pressures, **24**, 11
The Ratio NO_2/NO in Fuel-Lean Flames, **25**, 85
Effect of Fuel Sulfur Species on Nitrogen Oxide Emissions from Premixed Flames, **25**, 355
The Preignition Combustion Mechanism of Aniline Formaldehyde–Fuming Nitric Acid Hybrid Propellant, **25**, 129
On the Mechanism of the Copper (II)-Catalyzed Low-Temperature Decomposition of Ammonium Perchlorate, **25**, 269
Shock Tube Studies of Methane and Ethane Oxidation, **24**, 245
Effect of NO_2 on the Ignition Delay of CH_4-Air Mixtures, **24**, 181
Shock Tube Investigation of Ignition in Methane-Oxygen-Nitrogen Dioxide-Argon Mixtures, **24**, 173
Molecular Beam Sampling of H_2CO and NO in One-Atmosphere Methane-Air Flames, **24**, 391
A Suggested Mechanism for the Visible Chemiluminescence Observed in Gas Phase Aluminum Oxidation, **25**, 31
Prediction of Rocket Exhaust Flame Properties, **25**, 43
Flame Inhibition by Potassium Compounds, **24**, 277

17. LIQUIDS IN COMBUSTION PROCESSES

Temperature Distribution in a Vaporizing Droplet with Internal Heat Generation, **25**, 79
A New Large Damkohler Number Theory of Fuel Droplet Burning, **24**, 79
Nitric Oxide and Composition Measurements Within Diffusion Flames Around Simulated Ethanol and Ethanol-Pyridine Droplets, **25**, 107
Suspended Fuel Droplet Burning in a Combined High Temperature and High Temperature and High Pressure Environment, **25**, 259
Flame Stabilization on Fuel-Wetted Cylinders, **25**, 121
Ignition and Extinction of a Monopropellant Droplet in an Inert Atmosphere, **25**, 361
Asymptotic Theory for Ignition and Extinction in Droplet Burning, **24**, 89
Ignition of Sprays by an Incident Shock, **25**, 177
Flame Characteristics in the Wake of a Burning Methanol Drop, **24**, 273
The Effect of Droplet Size on the Burning Velocity of Kerosene-Air Sprays, **25**, 247
Flammable Limits Over Liquid Surfaces, **24**, 231
A Technique for Time Resolved Nitric Oxide Measurements in Auto-Igniting Mixtures, **25**, 197

18. LOW TEMPERATURE OXIDATION

Detection by E.S.R. of Peroxy Radicals: The Importance of Radical-Radical Reactions in the Slow Oxidation of Butane, **25**, 309
The Addition of Neopentane to Slowly Reacting Mixtures of Hydrogen and Oxygen at 480°C–I. Formation of Primary Products from Neopentane, **25**, 285
The Gas-Phase Reactions of Alkylperoxy Radicals Generated by a Photochemical Technique, **24**, 125
Diffusion Processes in the Slow Oxidation of Isobutane, **25**, 219

19. MODELING AND SCALING OF COMBUSTION PROCESSES

Asymptotic Theory for Ignition and Extinction in Droplet Burning, **24**, 89
Ignition and Extinction of a Monopropellant Droplet in an Inert Atmosphere, **25**, 361
A New Large Damkohler Number Theory of Fuel Droplet Burning, **24**, 79
Temperature Distribution in a Vaporizing Droplet with Internal Heat Generation, **25**, 79
Prediction of Rocket Exhaust Flame Properties, **25**, 43
A Shock-Tube Investigation of the High-Temperature Oxidation of Methanol, **25**, 343
Characteristics of an Open Diffusion Flame, **25**, 137
Electron Temperatures in Flames Gases: Experiment and Theory, **24**, 169
The Closed Bomb Test for the Assessment of Solid Propellant Grains Utilized in Guns, **25**, 229
The Stationary Problem of Thermal Ignition in a

Reactive Slab with Unsymmetric Boundary Temperatures, **24**, 203
Thermal Explosion Theory for a Slab With Spatially Periodic Surface Temperature, **24**, 269
Thermal Explosion of Interacting Hot Spots, **25**, 25
Critical Behaviour in Chemically Reacting Systems III—An Analytical Criterion for Insensitivity, **24**, 43
Asymptotic Analysis of a Premixed Laminar Flame Governed by a Two-Step Reaction, **25**, 389
Blast Waves Generated by Constant Velocity Flames: A Simplified Approach, **24**, 257
A Computational Technique for the Evaluation of Dynamic Effects of Exothermic Reactions, **24**, 319
Effects of Size and Dilution on Dynamic Properties of Exothermic Centers, **25**, 207
Predicted Effects of Fluid Dynamic Parameters on Nitric Oxide Formation in Turbulent Jet Diffusion Flames, **25**, 67
The Prediction of the Fluctuations in the Properties of Free, Round-Jet, Turbulent, Diffusion Flames, **24**, 109
A Modification of the Composite Propellant Erosive Burning Model of Lenoir and Robillard, **24**, 365
Thermal Explosion Theory for Reactive Flow Between Parallel Heated Walls, **24**, 151
Fire Induced Flow Through an Opening, **25**, 369

20. SOLIDS IN COMBUSTION PROCESSES

Thermal Explosion Theory for a Slab With Spatially Periodic Surface Temperature, **24**, 269
The Stationary Problem of Thermal Ignition in a Reactive Slab with Unsymmetric Boundary Temperatures, **24**, 203
Incomplete Decomposition of Ammonium Oxalate, **25**, 301
Direct Optical Evidence for the Presence of Sooty Agglomerates in Flames, **24**, 139
Soot Concentration and Absorption Coefficient in a Low-Pressure Flame, **24**, 1
Char Yield on Pyrolysis of Cellulose, **24**, 263
Deformation, Destruction and Ignition of the Layer of Solid Under Impact, **24**, 143
Towards Absolute Minimum Ignition Energies for Dust Clouds? **24**, 53
The Combustion of Flexible Polyurethane Foams: Mechanisms and Evaluation of Flame Retardance, **24**, 217
Fluid-Mechanical Effects on the Combustion Rate of Solid Carbon, **25**, 57
Experimental Study of Ignition and Subsequent Flame Spread of a Solid Fuel in a Hot Oxidizing Gas Stream, **24**, 357

21. SURFACE AND CATALYTIC EFFECTS

Role of Metal Perchlorate Ammines on Ammonium Perchlorate Decomposition, **25**, 387
The Reaction Between Hydrogen Sulphide and Nitrogen Dioxide, **25**, 213
On the Mechanism of the Copper (II)-Catalyzed Low-Temperature Decomposition of Ammonium Perchlorate, **25**, 269

22. THERMAL DECOMPOSITION PROCESSES

Role of Metal Perchlorate Ammines on Ammonium Perchlorate Decomposition, **25**, 387
Pyrolysis of Ammonium Perchlorate in a Stream of Perchloric Acid Vapor, **25**, 135
Pyrolysis of Isopropyl Nitrate. I. Decomposition at Low Temperatures and Pressures, **24**, 11
Ignition and Extinction of a Monopropellant Droplet in an Inert Atmosphere, **25**, 361
Incomplete Decomposition of Ammonium Oxalate, **25**, 301
Experimental Study of Ignition and Subsequent Flame Spread of a Solid Fuel in a Hot Oxidizing Gas Stream, **24**, 357

23. THERMOCHEMISTRY AND THERMODYNAMICS

An Investigation of Arsenic and Antimony Additives in Unseeded and Potassium-Seeded H_2/O_2 Flames, **25**, 101
